

L.J. Institute of Engineering and Technology
Individual Project Details -- COMPUTER NETWORKS (CN)

SR. NO	Project Definations
1	implentation of peer- to - peer security using packet tracer.
2	Implement all te topoioies used in one network in packet tracer tool.
3	write a proram to LRC. (ANY LANUGAGES)
4	write a proram to VRC.(ANY LANUGAGES)
5	analyzin network traffic from a LAN in usiug LAN
6	Implmenting Bit stuffing in c or any language
7	Implement Simplest protocol in C or any Language
8	Implmenting Byte stuffing in c or any language
9	Implement error detection only in c or any language.
10	Implement parity finding as even or odd parity in data in c or any language
11	LAN DESIGN
12	C CODE BINARY COUNT DOWN
13	PARITY FINDING USING C
14	LRC,VRC,CRC AND CHECKSUM USING C
15	GO BACK AND N SELECTIVE REPEAT USING C
16	OSPF PROTOCOL
17	DISTANCE VECTOR ROUTING
18	CLASSFUL IP ADDRESS
19	VIEWING SMART PHONE TRAFFIC WITH WIRE SHARK.
20	FIREWALL NETWORK SYSTEM
21	IMPLEMENT HYBRID TOPOLOGY
22	OSPF WITH AMAZON SERVER IN WIRESHARK
23	RING TOPOLOGY
24	VALIDATION OF MAC ADDRESS FOR UNICAST,MULTICAST & BROADCAST PROTOCOL
25	DIJKSTRA ALGORITHM IMPLEMENTATION
26	MORDERN GARDEN SYSTEM IN PACKET TRACER
27	VALIADTION OF IP ADDRESS
28	IMPLEMENT VPN
29	CLOUD NETWORK IN CISCO PACKET TRACKER
30	DESIGN LAN USING CISCO PACKET TRACER
31	IMPLEMENT DIJKSTRA ALGORITHM
32	CONFIGURE LAN NETWORK
33	VALIDATION OF MAC ADDRESS
34	FLOW CONTROL USING C
35	FRAMING TECHNIQUES
36	SLIDING WINDOW PROTOCOL IN C
37	WRITE A PROGRAM TO PERFORM CHCKSUM BOTH SIDE.
38	CONFIGURE TREE TOPOLOGY
